Objective:

In our rapidly evolving tech landscape, staying at the forefront requires adaptability and passion. I find satisfaction in problem-solving, offering a new perspective. As a versatile and skilled professional, my aim is to deliver tasks with greater efficiency, lower costs, and heightened quality and creativity.

Work Experience:

- 2 Feb 2022 – 16 Aug 2022: full stack development trainee at Tahaluf Alemarat

Responsibilities: RESTFUL web service, Asp.net , HTML,CSS,JavaScript, Oracle and angular.

Summary of Qualifications:

- Python, C#
- basic of Entity Framework for Object-Relational Mapping (ORM)/ Restful API.
- Relational Database: SQL Server/ Oracle .
- Familiar with Git
- basic of HTML / CSS / JavaScript / Bootstrap.
- Very good knowledge in OOP.
- Data structure libraries / Design Patterns.
- Perfect communication skills (verbal and written)
- Eager to learn new technologies.
- Problem Solving Skills.

Projects:

1- Graduate Project: Smart Online Store:

This project evaluates three recommendation algorithms: K-Nearest Neighbor (**KNN**), **Apriori**, and **Collaborative Filtering**. KNN offers personalized recommendations, Apriori targets discounts for frequently purchased items, and Collaborative Filtering suggests top-rated items from similar users

2- A social networking site (Mada):

A social networking site developed using **Asp.Net Core** with **Angular** and **Web API** that contains chat between friends, post space for everyone, the ability to add stories, and start a new ad. - Within my team at Tahaluf Al Emarat.

3- UNO game engine at Atypon company:

Reimplementing for the UNO Game by giving the user to modify the rules OR adding new cards and make their actions OR remove existing cards from the game OR modify card action using **Java** and applied a **design pattern** with it.

Education:

- B.Sc, Computer Science, GPA: **85.1 (A+)**, Yarmouk University.

Courses and Certification:

- 2023 Apr – Aug: DevOps Engineer trainee at Atypon company
